Basic Requirements for First release launched on the address

- (1) All pages that are mentioned in the ppt presentation should be present
- (2) The images of the demo static pages need to be befitting to our values. Preferably excellent natural panoramic views or flowers.
- (3) The Interface seems out of date, can you use modern web version
- (4) The most important feature for the 1st release is to store all the information of the bride/groom according to our prescribed biodata format which the candidate can see in a pdf format and the admin should be able to receive a sortable spreadsheet version to be able to manipulate the data using known interface like excel.
- (5) The demo version of the static pages has issues regarding data validation, in the first released version these issues needs to be fixed.
- (6) Admin should be able sort the available data by profession such as, doctors, engineer or by region/state e.g. NY, NC and similar other features.
